Elections

HB 2178 (Sickles) (Passed House; SPE) directs the State Board of Elections to promulgate regulations and standards necessary to ensure the security and integrity of the Virginia voter registration system and the supporting technologies utilized by the counties and cities to maintain and record registrant information. Records describing protocols for maintaining the security of the Virginia voter registration system and the supporting technologies utilized to maintain and record registrant information are exempted from the Freedom of Information Act and meetings to discuss those protocols are permitted to be closed pursuant to the provisions of the

Freedom of Information Act. The bill requires the State Board of Elections to convene a work group prior to adopting security standards and to establish a standing advisory group of local government IT professionals and general registrars to assist and consult on updates to security standards. (19101864D-E)

HJ 591 (Cole) (Agreed to by House; SPE) gives the General Assembly the authority to make technical adjustments to legislative electoral district boundaries following the enactment of any decennial reapportionment law. Such adjustments may be made solely for the purpose of causing legislative electoral district boundaries to coincide with the boundaries of voting precincts established in the counties and cities and shall be permitted only to the extent necessary to accomplish this purpose. In order to be submitted to the General Assembly for a vote, a plan must receive an affirmative vote of at least six of the eight legislative members and six of the eight citizen members. No amendments may be made to a plan by the General Assembly or the Governor. In the event that the Commission fails to submit a plan by its deadline, or the General Assembly fails to adopt a plan by its deadline, or the Governor fails to act on or vetoes a plan by his deadline, districts shall be decided by judicial decision.
