GC = General Conditions as noted in the "Approved Development Conditions, SEA 80-L/V-061, dated January 8, 2007)

## **Additional Comments:**

As of December 2020, the facility closed its gates and removed all equipment from this site. Waste Management aims to be in Post Closure by April 2021, with inspection by DEQ.

Although there are administrative compliance concerns noted above related to maintenance of certain plans and records on-site, the impending formal closure of the facility likely renders these concerns moot. Review of the missing records (subsequently provided by Waste Management) indicate no significant compliance concern. M. G. 2-25-2021
